multisensory for everyone

Congratulations on the purchase of your Portable LED Bubble Tube!

The Portable LED Bubble Tube has been designed specifically for people with special needs and should, if used in accordance with these guidelines, offer years of fun!

The Portable LED Bubble Tube is designed to calm and relax an individual in certain settings.

It is the brightest LED Bubble Tube currently available (at time of print) and produces multiple shades of colors when used in Portable mode.

Please ensure you read and follow these Instructions carefully before operating the unit. Please keep this manual for future reference.

Features

- Ergonomic design
- Latest LED technology. No changing bulbs.....EVER!
- Clear acrylic lid
- Molded plastic base
- Low voltage transformer – supplied
- Easy maintenance
- Durable
- Easy to use
- 1 Year Manufacturers Guarantee (Collect and Return)

Pack contents

- 1 x Portable LED Bubble Tube
- 1 x Clear acrylic Lid
- 1 x Low Voltage Transformer

Getting Started

1. Remove all packaging including clear film around the tube. Please note, the tube may contain a small amount of water, this is from our testing process, and completely normal.
2. Place the Portable LED Bubble Tube on a flat solid floor. **To prevent water from entering the base in the event of an accidental spill, wrap a towel around the clear acrylic column.**
3. Carefully fill the bubble tube with water from the top. If you spill any water, please ensure this is cleaned immediately. Do not fill the tube to the top; allow 3-4 inches (150mm) from the water level to the top of the tube.
4. Plug the small, round end of the transformer into the receptacle on the base, and the plug end into any nearby outlet.
5. The Bubble Tube will now illuminate and begin scrolling through many colors.

Please note: Use only the transformer supplied. Use of a different transformer may result in damage to the product and void the warranty.

Cleaning and Maintenance

The unit should be cleaned with a damp soft cloth. A non abrasive cleaning agent may be used for stubborn stains. Be sure no liquid enters the base of the unit.

The unit has been designed for use by people with special needs, however this does NOT mean it is unbreakable. You must be sure the unit is not hit with anything and that no one pulls or pushes the unit.

Changing Bubble Tube Water

All bubble tubes require that the water in them be changed every 4 – 6 weeks to slow the build up of any bacteria. Because the portable bubble tube is so small, we recommend you change the water with greater frequency.

Because the portable bubble tube is small, it is easier to remove the water. Simply wrap a towel around the base of the column, then carefully pick the bubble tube up and carry it to a utility sink (if available), or a toilet, and dump the water. **Make sure that water does not run over the edge and stream down the column.** If this happens, and water enters the base and reaches the electronics, the bubble tube will be ruined. This is not considered a warranty repair, as it is easily preventable, so please wrap the column in a towel for each water change.

BCB Solution

BCB solution is recommended if you plan on leaving the water in this bubble tube for any length of time, we recommend our BCB water treatment solution. It helps regulate bacteria and algae growth, and can be found by searching “BCB” on our website (www.experia-usa.com). If you remove the water on a daily basis, it may not be necessary.

Troubleshooting

Q. The unit doesn't work.

A1. Is it switched on? If so,

A2. Has the unit scrolled through its colors? If so,

A3. Please contact us for further assistance.
