experia **usa**
multisensory for everyone

For optimal results, please read and follow instructions carefully
Please keep for future reference

WARNING: CHOKING HAZARD
Small Parts: Not suitable for children
under 3 years.

3+ years

Congratulations on the purchase of your Mini LED Bubble Tube!

The Mini LED Bubble Tube has been designed specifically for people with special needs and should, if used in accordance with these guidelines, offer years of fun!

The Mini LED Bubble Tube is designed for home use, of for those who are on the go, or who need to bring a calming environment to their destination. Measuring just 30” in height, it fits into larger-sized luggage for easy portability.

Please ensure you read and follow these Instructions carefully before operating the unit. Please keep this manual for future reference.

Features

- Ergonomic design
- Latest LED technology. No changing bulbs.....EVER!
- Clear acrylic lid
- Molded plastic base
- Low voltage transformer – supplied
- Easy maintenance
- Durable
- Easy to use
- 1 Year Manufacturers Guarantee (Collect and Return)

Pack contents

- 1 x Mini LED Bubble Tube
- 1 x Clear acrylic Lid
- 1 x Low Voltage Transformer

Getting Started

1. Remove all packaging including clear film around the tube. Please note, the tube may contain a small amount of water, this is from our testing process, and completely normal.
2. Place the Mini LED Bubble Tube on a flat solid floor.
3. Carefully fill the bubble tube with water from the top. If you spill any water, please ensure this is cleaned immediately. Do not fill the tube to the top; allow 2-3 inches (150mm) from the water level to the top of the tube.
4. Plug the small, round end of the transformer into the receptacle on the base. Connect the standard 110v AC plug to a nearby outlet.
5. The Bubble Tube will now illuminate and begin scrolling through many colors.

NOTE: NEVER LEAVE THE MINI BUBBLE TUBE UNSUPERVISED. DUE TO ITS SMALL SIZE, IT IS EASY TO KNOCK OVER AND OR SPILL THE WATER IF NOT PROPERLLY ATTENDED TO.

Please note: Use only the transformer supplied. Use of a different transformer may result in damage to the product and void the warranty.

Cleaning and Maintenance

The unit should be cleaned with a damp soft cloth. A non abrasive cleaning agent may be used for stubborn stains. Be sure no liquid enters the base of the unit.

The unit has been designed for use by people with special needs, however this does NOT mean it is unbreakable. You must be sure the unit is not hit with anything and that no one pulls or pushes the unit.

Changing Bubble Tube Water

Because the bubble tube is so small, we recommend that you dump the water each evening after use, or prior to moving the bubble tube.

1. Remove the lid off the column.
2. Carefully carry the bubble tube to a nearby sink or toilet, and dump the water out. However.....you must be careful to keep water from running over the edge and back down the tube into the base.

If you DO keep water in the tube for extended periods of time, we recommend the use of our BCB Solution to keep the water free from bacteria and algae growth.

Troubleshooting

Q. The unit doesn't work.

- A1. Is it switched on? If so,
- A2. Has the unit scrolled through its colors? If so,
- A3. Please contact us for further assistance.
